Although the expenditures the past year might lead you to believe that the yards are in good condition, there will be the need of much work on them the coming summer, on account of the necessity of bush cutting and minor gate and fence repairing.

In view of this fact, it is my suggestion, that the town raise the sum of twenty-five dollars (\$25) to carry on this work.

## NEW HIGH SCHOOL BUILDING

After purchase of the building site, a narrow strip of land was bought of Chase Brothers to provide an entrance on the main street toward which the building will face.

On account of a ruling of the State Board of Health, filter beds had to be built between the septic tank and the drain outlet.

It was decided to make the north end of the basement about two feet deeper than planned (all that drainage conditions would allow) in order to give better height in the play room. To meet this extra expense, pledges were secured from interested persons, amounting to about four hundred dollars.

The foundation has been completed and the first floor laid. Lumber, doors, and windows for practically the whole job except clapboards, finish, and flooring are on the ground and paid for.

# Superintendent's Report

---

I herewith submit my third annual report.

The record of attendance and general achievement for the year ending June 30, 1924, was much more satisfactory than for the previous year. We were able to keep all schools open 175 days out of the year of 180 days provided for by state law. The attendance averaged nearly 93%, which means that all children averaged 162 days actual time spent in school.

Thus far the record for the current year shows a substantial gain over that of last year. Every one should realize that perfect attendance every day is an important factor in eliminating waste and promoting the efficient expenditure of the tax payers' dollars. School attendance and school work are of the utmost importance in the life of every child.

While you have found it necessary to open three new schools in as many years, the number of pupils enrolled in the district, as a whole, during the past four years, has been about the same. If there is a real increase, it is in the lower grades.

The first grade for the current year numbers 31, which equals the whole number enrolled in that grade last year. The number in the eighth grade for the current year is 11, exactly the same number that entered the High School in September. The enrollment in the seventh grade is 21, in the sixth grade 14 and the fifth grade 21. There are changes in all grades from year to year, due to families coming and going.

The present tendency is for practically all who complete the eighth grade to enter the High School. There-

fore we may safely count on a High School enrollment of from 40 to 50 every year, providing present conditions remain fairly constant.

When the new High School building is completed, there will be ample accomodation for a Junior-Senior organization, covering six years instead of four, as at present. This arrangement would make it possible for every child in town to have the advantages of superior training and discipline during the difficult period of transition from the sixth grade to the "Senior High School. In fact, they would be a vital part of all the High School life and activities. The three High School and ten Elementary School teachers unanimously favor this plan, believing that the High School will receive great benefit from the extra teacher and enlarged numbers, and that the Elementary schools can do infinitely better work with six grades than they could possibly do with eight grades, as at present organized.

Health work for school children is becoming increasingly important. Before the end of the present school year Miss Myrtle Flanders, of the Concord Red Cross, will have examined all children in the schools. She visits the homes of the children, where conditions observed in school make it advisable. This type of examination is very good as far as it goes, but it does not go very far. The best solution of the problem is, a resident physician with definite school duties, or a district nurse, giving as much time as possible to health supervision in the schools.

Along this same line, experience is proving that, under present conditions, the admission of children under the age of six years is not for the best interests of the children themselves nor of the schools. I therefore recommend that no child under six years be admitted to the schools, except by special permission of the School Board.

The general repairs made during the past summer have raised the sanitary and safety standards of the most needy buildings. The addition of a play ground at Sugar Hill, is

worthy of special commendation. I recommend that extensive repairs be made on the interiors of the Buxton and North Weare buildings as soon as possible.

In closing, I extend appreciation for the fine spirit of coöperation of parents and others who have taken such a vital interest in furthering the cause of education in Weare.

Respectfully submitted,

GAINES H. BARRETT,  
*Superintendent*
